

Interview Questions: IDRC Review

These questions relate to a specific funder policy on research data sharing (either of your organisation or one that you have interacted with)

1. What is the most recent research data sharing policy you've interacted with? *Aim of being able to find a link to policy details*
2. Do you have a sense of the degree of compliance by researchers subject to this policy?
3. What is the strongest aspect of the policy in gaining support and adoption from researchers?
4. What is the most challenging aspect in gaining support and adoption from researchers?

These questions relate to other policies that you have knowledge of or contact with.

1. Which policy would you identify as the most successful in gaining support and adoption from researchers?
2. What aspects of that policy are important in achieving this?
3. What significant unresolved issues do you see in the *design* of policies that gain support and adoption from researchers?
