Project: South Africa Natural Justice

Data Identified (from DMP)	What has changed (from what is in DMP)?	Where is it backed up?	Who can access it now?	Is it public?	Location?	What Barriers were there for sharing?			
						Workload	Technical issues	Expertise	Ethics
Interviews with Human Subjects		*Google Cloud 10[?] Box Laptop harddrive*	*Only research team and professional transcriber (time limited)*	*No*	*N/A*			*X [1]*	*X*
Analysis of Interviews		*Google Cloud Laptop Ext. harddrive*	*Only researchers*	*No*	*N/A*				*X*
Research related correspondence		*Google Cloud Laptop Ext. harddrive*	*Only individuals in email chain*	*No*	*N/A*				*X*
Analysis of research related correspondence	*We have decided not to share emails with other researchers as ethical issues.*	*Not yet complete*	*N/A*	*No*	*N/A*				*X*

Relates to community - Research contracts	*Thus, researcher will look at changes eg. to documents (not emails)*								
Community meeting and peer learning		*Google Cloud Laptop Ext. harddrive*	*Only researchers and M+E consultant*	*No*	*N/A*				*X*
Analysis of Meetings/activities		*Google Cloud Laptop Ext. harddrive 10[?] Box*	*Only researchers and M+E consultant*	*No*	*N/A*				*X*

[1] Here expertise relates to elements of the interviews that should not be shared if we had overcome the ethical issues for sharing data. Eg. analysis of implications of sharing indigenous knowledge and legal issues and lack of protection.

Comments and notes
To share indigenous knowledge we would have needed to go through an extensive free, prior and informed consent process with the individuals and the community representatives; this would require a deep understanding of the implications of sharing IK on intellectual property rights issues and possible beneficiation of holders - should in the future, the IK be utilised, etc.
